EDUCATION

University of Illinois Urbana-Champaign

Urbana, IL

Masters of Computer Science

August 2025 – May 2026

Bachelor of Science in Computer Science, Minor in Math

August 2022 – May 2025

EXPERIENCE

Jump Trading

Chicago, IL

Software Engineering Intern

June 2025 – August 2025

- Optimized post-trade analytics pipelines

Modern Treasury

New York, NY

Software Engineering Intern

May 2024 – August 2024

- Designed and implemented new data ingestion infrastructure, achieving a 275x throughput improvement
- Developed new input validation system, resulting in 30x performance gain and enhanced observability
- Employed task pipelining and query batching, minimizing CPU idle time and reducing database load
- Identified and optimized bottlenecks in data ingestion systems by leveraging Datadog traces

University of Illinois Urbana-Champaign

Urbana, IL

Research Assistant

August 2025 – December 2025

- Prototyped a new permissioning system for PrairieLearn, enabling more intuitive and flexible control over student assignment access.

Course Assistant

August 2023 – May 2025

- Integrated cheating detection mechanisms into autograder pipeline, improving plagiarism detection
- Graded homework and assessments efficiently for accuracy and comprehension
- Provided personalized assistance through office hours to 2,500+ students

Parallel Programming Laboratory

Urbana, IL

Undergraduate Research Assistant

June 2023 – May 2025

- Assisted with development of parallel I/O library for Charm++ to speed up read and write operations by 400%
- Developed a distributed data streaming library for high performance computing applications

ORGANIZATIONS

ACM @ UIUC

August 2024 – May 2026

- Developed a custom Typst-based typesetting engine that enhanced document formatting flexibility and improved the newsletter creation workflow
- Created instructional review resources and facilitated review sessions, improving student comprehension of challenging course topics
- Deployed and maintained a student-contributed wiki, enabling better access community-driven information

Reflections | Projections

February 2023 – October 2023

- Architected a robust QR Code-based attendance tracking system to track 1,900+ attendees
- Interfaced with AWS S3 to support resume upload, storage, and distribution from attendees to corporate sponsors
- Designed and deployed a responsive schedule component and staff dashboard using Svelte and SvelteKit

Disruption Lab

February 2023 – August 2023

- Researched behaviors of various malwares and their effects on hardware performance counters
- Conceptualized a SVM learning model to accurately classify malware and non-malware programs
- Employed tooling such as PAPI and AMDuProf to collect data from various HPCs while running malware

TECHNICAL SKILLS

Languages/Frameworks: C++, Python, Triton, TypeScript, Java, Ruby on Rails, SQL, Svelte, Astro

Technical Skills: Git, Docker, Amazon Web Services, RESTful Web Services, PyTorch, MongoDB
